HOPE & HEALING: Dr. Shelina Musaji

Let your heart swell with hope this Earth Day.

Join us in welcoming local physician, Dr. Shelina Musaji, who will present on an exciting and innovative project in Borneo, Indonesia. Alam Selat Lestari (ASRI) provides high-quality health care while conserving rainforest and saving orangutans by dramatically reducing illegal logging, much of which was motivated by local residents' needs for cash to pay for health services. Dr Musaji will share slides from her (pre-COVID-19) travels and months of volunteering at this clinic with her family. Come hear how you, too, can volunteer and be part of this good-news story.
